

# Innovative solutions

accelerate your production

**1995**

Foundation as US Special Tools headquartered in Wipperfürth-Hämmern, Germany. The portfolio includes milling tools, HSS, carbide and burs.

**2000**

Relocation from Wipperfürth-Hämmern to Mühle 1 in Wipperfürth, Germany.

**2005**

The US Special Tools team is growing to 8 employees. Launch of a labelling machine.

**2006**

First use of laser technology for tool marking.

**2009**

Relocation to larger premises on the Hansestraße in Wipperfürth. Expansion of our range of products by drilling tools.

**2013**

Mr. Wolfgang Lambertz takes over the management of US Special Tools.

### Rising standards on cutting performance

With the development of new technologies and materials that exert a significant influence on your productivity, the metal cutting industry is subject to constant change. Ever-rising constraints in time and cost paired with high expectations in terms of quality compel organisations to act. The usage of state-of-the-art cutting technologies allows for time savings of up to 60%. So, developing efficient solutions is growing increasingly important.

### Precision tools boost cutting efficiency

Since 1995 we have been developing precision tools made from durable and high-performance cutting material. Our business mainly focuses on helping you to boost efficiency and find solutions that meet those ever-growing demands you as our customer are facing, and that are the incentive for us to constantly get better.

Permanently analysing new market trends and technical innovations, we continuously work on improving our products and services. Since 2017 we hold an ISO 9001:2015 certification for the development, distribution, and logistics of precision tools.

### Keeping our know-how up to date

Our staff is our greatest asset. Being the point of contact for our existing and prospective clients, our employees are always committed to finding solutions that work best for the relevant applications. At regular intervals, all our colleagues take part in internal and external training courses on new trends and technologies. Keeping our know-how up to date empowers us to provide our customers with the best possible support and expert advice.

#### 2014

The company headquarters is relocated from Wipperfürth to Burscheid. The warehouse and office space grows from 500 sqm to 2,000 sqm. Automation of many processes, installation of a warehouse management system.

The product portfolio is expanded by indexable inserts for turning and milling applications.

#### 2015

US Special Tools becomes the TOOL FACTORY Cutting Tool Solutions GmbH.

The part of in-house developments is growing steadily.

#### 2017

The TOOL FACTORY Cutting Tool Solutions GmbH holds an ISO 9001:2015 certificate for the development, distribution, and logistics of precision tools. Installing the first sales engineer

#### 2019

Launch of our customer web shop to order online all products from our catalogues.

## Only tools in use prove their quality of use

With a wide range of products and individual solutions we are able to meet all requirements for effective machining. Constantly improving our business and our portfolio, we have become one of the leading suppliers of drilling and milling tools. We provide a range of tools from the smallest diameter up to complex tooling systems suitable for the machining of high-tensile materials, so we are able to offer you the right solution for whatever machining application.

## Our commitment to high quality standards

We attach great importance to delivering long-life products of consistently high quality. Therefore, all tools are thoroughly tested. Our low number of customer complaints proves that our commitment to high quality standards is not only empty words. You can be assured that our tools keep to our promise.

## Our product portfolio includes:

- Drills
- End mills
- Machine taps
- Indexable inserts and holders for turning, milling and threading
- Carbide burs

On YouTube we provide videos about the application of our products - take a look for yourself:

### A reliable trading partner

As a trustworthy supplier, we are also a reliable trading partner for you. We do not only provide our cutting tools for direct delivery to our end users' machining facilities, but also deliver our products to our trading partners for the purpose of resale. Also, we offer our trade partners a special service: TOOL FACTORY products and solutions can be ordered as "Private Label" products, so you will receive your tools individually lasered and packaged with your own label.

### Challenging applications require individual special solutions

Special tooling may be required rather than standard tools to achieve the best possible machining results. In close cooperation with you we develop individual special solutions or machining strategies to customize the required tooling solution according to your specific needs. Instead of adapting your requirements to the tool, we help you to find the right tool for your individual needs. Your efficiency and the optimum design of all machining processes are at the top of our game.

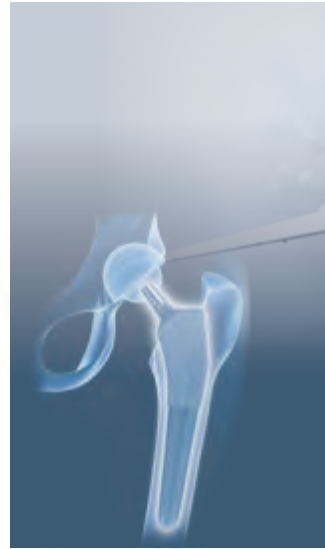

## Short-term requests, fast delivery

With more than 10,000 items always in stock, we are able to process your enquiry in a fast and flexible way with a quick delivery guaranteed. Our substantial stocks and a modern warehouse management system allow us to ship your products on the same day, ensuring a worldwide next-day delivery on time so you can use your tools as planned.

## Simply order online 24 hours a day

For our clients, all items from our catalogue are also available in our online shop. Sorted by product groups, you can select the required tool and check its availability at a glance. With the established conditions also applicable for the online shop, our customers can order the required tool simply and fast, and whenever they want.

### Come and see us

We are proud to say that renowned national and international companies from the aerospace, automotive and medical technology industries are among our customers. More than only being a supplier, we are a reliable partner to help you with all your application requirements.

Our field service or application engineering department will provide you on site with individual and competent advice on all your specific needs. Or simply come and see us at our booths at the AMB, Intec or EMO to get a first idea of our range of products and services.
